

STAINLESS STEEL ACCESSORIES

Infinity ® structures can be fitted with a complete range of high quality stainless steel accessories made with superior craftsmanship. Beyond their intrinsic hygiene and durability qualities, our stainless steel equipment offer very functional design and guaranteed safety to workers.

COLD ROOMS

Ice formation is a common problem when introducing cold sections into the structure. Whether your facility has a cold room, blast freezer or cold storage, our structures guarantee that there will be no ice formation under the insulation.

INFINITY® STRUCTURES

Endless Possibilities

As the name suggests, the INFINITY® range of products are as unlimited as your own imagination. These fully bespoke solutions are the pinnacle of prefabricated buildings whether it is for hatcheries, meat processing, warehousing, food processing, chilled storage, blast freezing. The list of uses and designs is infinite.

BIO-SECURITY & FOOD SAFETY

As bio-security is our top priority when designing and building C-Lines structures, all surfaces are made smooth for easy cleaning thus reducing the risk of bacteria loading on materials. All joints are silicone sealed to prevent external water ingress. All food preparation and processing structures, internal rooms are FDA approved with regards to food safety and food handling regulations.

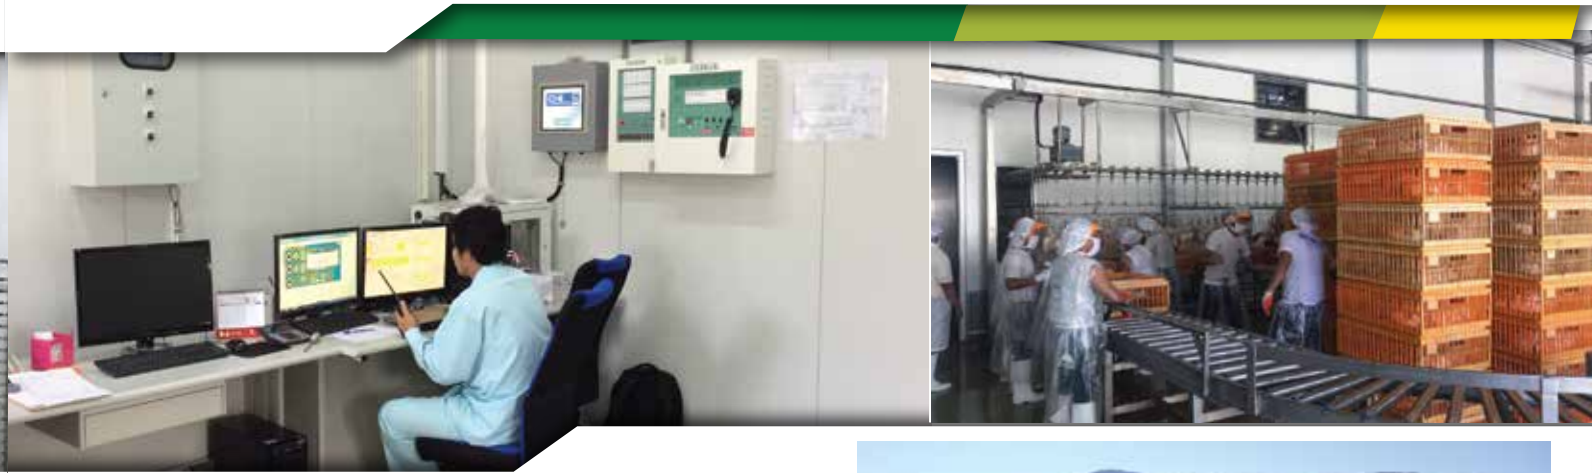

Infinity Structure

The INFINITY ® range of buildings offer the best possible performance in terms of control of the working environment, biosafety and process optimization. Our flexible customer-centric design approach, will help you to visualise your ideal building right from from the initial consultation, through to completion.

DESIGN

When we say we can build any structure, we mean it. C-Lines INFINITY® prides itself in designing fully tailor made structures to suit any and all your needs. All C-Lines pre-fabricated structures are designed and built to be strong, highly durable and extremely cost effective.

MANUFACTURING

All components are calculated in Eurocodes and made with the highest integrity materials. When fully assembled, there are no visible posts inside, giving you the freedom to maximize the structure's area.

FLOORING & FINISHING

Fully sealed flooring is an essential but often overlooked component of a food preparation or chilled storage area. Choose from a wide range of PU and Epoxy coated floors for a sleek and functional finish. Our protective PVC plinths and angles ensure that your walls remain damage and scratch free from being grazed by trolleys and other equipment.

INSTALLATION

Using our in-house quality controlled, prefabricated design makes for an easy and rapid installation. C-Lines provides step-by-step instructions to erecting Infinity@ structure.

DRAINAGE

Efficient waste removal is important to your operation. As part of our turnkey solution, all sub-structure details, drainage and plumbing can be supplied with Infinity@ structures.

DOORS

Often overlooked, the choice of doors, windows and other wall furniture is important. We offer a comprehensive range of accessories to cope with any requirement, from meat processing to clean-room facilities. Types of doors supplied include sectional, sliding, swing, office and fast doors. C-Lines takes safety seriously so all door windows are equipped with highly durable, shatter-proof glass.

ELECTRICAL

All electrical design and installation can be supplied by C-Lines in accordance with the equipment supplier and customer's needs.

ROOF

Roofing is available in PU sandwich panel, corrugated lacquered trapezoidal metal sheets or Aluminium-Zinc coated metal sheets. All roof material options are sleek in design and provide excellent sun and rain protection.

ATTIC SPACE

Our structures offer very spacious attics to accommodate technical networks such as AHU, electrical cabling and piping keeping your production facility free of hanging cables and pipes. The large air buffer in the attic also helps regulate the building's temperature.

WALLS

Our walls are specifically designed for agriculture and food industry requirements with improved insulation and free of any thermal bridge. Infinity@ walls can be fitted with various industry equipment and protection attachments. The smooth bio-secure surface makes cleaning a breeze.
